

```
traffic_signal_controller  
_service::udp_socket_listener  
::initialize
```

```
graph LR; A["traffic_signal_controller  
_service::udp_socket_listener  
::initialize"] --> B[to_string]
```

A diagram showing a call to the `to_string` method. On the left, a gray rectangular box contains the text `traffic_signal_controller`, `_service::udp_socket_listener`, and `::initialize` stacked vertically. A blue arrow points from the right side of this box to a white rectangular box on the right. The white box contains the text `to_string`.

```
to_string
```
