

streets_utils/streets
_api/intersection_server
_api/src/models/OAIObject.h

```
graph TD; A["streets_utils/streets  
_api/intersection_server  
_api/src/models/OAIObject.h"] --> B["QJsonDocument"]; A --> C["QJsonObject"]; A --> D["QMetaType"];
```

The diagram illustrates the relationship between a source file and three classes. A central gray box at the top contains the file paths: 'streets_utils/streets', '_api/intersection_server', and '_api/src/models/OAIObject.h'. Three blue arrows point from this box to three separate white boxes below it. The left box is labeled 'QJsonDocument', the middle box is labeled 'QJsonObject', and the right box is labeled 'QMetaType'.

QJsonDocument

QJsonObject
