

streets\_utils/streets  
\_api/intersection\_server  
\_api/src/models/OAIObject.h

```
graph TD; A["streets_utils/streets  
_api/intersection_server  
_api/src/models/OAIObject.h"] --> B["QJsonDocument"]; A --> C["QJsonObject"]; A --> D["QMetaType"];
```

The diagram illustrates a C++ header file's includes. A central box lists the file path and name: streets\_utils/streets, \_api/intersection\_server, and \_api/src/models/OAIObject.h. Three arrows point from this box to three separate boxes below it, representing the classes included: QJsonDocument, QJsonObject, and QMetaType.

QJsonDocument

QJsonObject
