

streets\_utils/streets  
\_api/intersection\_client  
\_api/OAIObject.h

```
graph TD; A["streets_utils/streets  
_api/intersection_client  
_api/OAIObject.h"] --> B["QJsonDocument"]; A --> C["QJsonObject"]; A --> D["QMetaType"];
```

The diagram illustrates a header file's dependencies. A central box at the top lists the file path: streets\_utils/streets\_api/intersection\_client\_api/OAIObject.h. Three arrows point downwards from this box to three separate boxes below it, representing the classes it includes: QJsonDocument, QJsonObject, and QMetaType.

QJsonDocument

QJsonObject
