

OpenAPI::OAIDefaultApi
::setNewServer

OpenAPI::OAIDefaultApi
::setNewServerForAllOperations

OpenAPI::OAIDefaultApi
::addServerConfiguration

```
graph LR; A[OpenAPI::OAIDefaultApi::setNewServer] --> C[OpenAPI::OAIDefaultApi::addServerConfiguration]; B[OpenAPI::OAIDefaultApi::setNewServerForAllOperations] --> C;
```

The diagram illustrates a relationship between three methods. On the left, two white rectangular boxes represent the source methods: 'OpenAPI::OAIDefaultApi::setNewServer' (top) and 'OpenAPI::OAIDefaultApi::setNewServerForAllOperations' (bottom). On the right, a gray rectangular box represents the target method: 'OpenAPI::OAIDefaultApi::addServerConfiguration'. Two blue arrows point from the source methods to the target method, indicating that both source methods delegate or call the target method.
